SUMMARY

Software Engineer with a specialty in **Typescript** full stack and team management. I have more than **6 years** of experience with **Node.js** as backend, **React & Angular** as Frontend, **Mongo & SQL** as Storage.I am well-acquainted with many programming languages such as **Go, Python, Java, C#**.

I also have more than **5 years** of experience in **DevOps** engineering with **AWS**, **Azure**. I am proficient with building **microservices** and **API Design and System Architecture**.

EXPERIENCE

Senior Backend Engineer

Fortunes Tech

01/2023 - Present
● Remote

Stack: Nest, Microservices, Angular, Mongo, GoLang, PostgreSQL, AWS, Elastic Search, Docker, Next.js, Graphql

- · Built API endpoints with Nest Framework, NodeJS.
- Implemented SEO friendly SPA with Next.js.
- · Integrated internal microservices built with GoLang for transport route optimization and billing automization.
- Configure AWS bitbucket pipelines for CI/CD.
- Laid and designed architectural foundation of Graphql layers for communication between microservices.
- Designed PostgreSQL database for microservices.

Full Stack Engineer

Toptal

Stack: React, Redux, Express, Redis, Search Engine Integration, Microservices, Golang, gRPC

- · Developed restful web APIs with Express as backend, MongoDB as storage.
- Built responsive and pixel perfect dashboard and UI/UX with React components.
- Designed architecture of NodeJS fullstack application writing site roadmaps and drawing timelines.
- Implemented DDD microservices with Golang, using gRPC as communication.
- Optimized overall performance to 135% with Redis as memory db.

Software Engineer

NetApp

Stack: Angular, Nodejs, AWS devops. Linux, Third-party integration, Bootstrap

- Managed and maintained dashboard with Angular for food delivery and property management services. Bootstrap used for many of the UI elements. Implemented DIY customization for preferences and features. Introduced a system of automated assigning/dispatching of drivers and contractors to selected locations.
- Integrated a wide range of third-party services and components like payment gateways, geo-location services, and social media logins.
- · Wrote Linux scripts to quickly start/restart/check status of multiple web services
- AWS S3, EC2, Beanstalk, CDN for deployment and Jenkins for automatic testing.

Software Engineer Intern

Appen

Stack: Git, Agile Software Programming, HTML, Laravel

- Built HTML pages with provided design using sass.
- · Learnt efficient work culture including Git and Agile methodologies.
- · Implemented rest APIs with Laravel.

SKILLS

| HTML | CSS | Javascript | Angular | React | Vue | Redux | Туре | Script | AWS | Bootstr | ap Git |
|--------|-------|------------|---------|---------------|-----|---------|------|--------------|-----|---------|--------|
| Mongo | Linux | Redis | Graphql | Microservices | | Laravel | PHP | React Native | | Mysql | Docker |
| Golang | Postg | Postgresql | | | | | | | | | |

EDUCATION

Bachelor's Degree in Computer Science
