Soto Hernandez

SENIOR SOFTWARE DEVELOPER

PROFILE

Soto is a full-stack engineer with expertise in Ruby on Rails, Django and Node.js. He is keenly interested in algorithm-level efficiency and has experience working both with front-end and back-end technologies as well as frameworks. Soto is also a competitive programmer who actively participates in different online challenges. He loves learning about anything, especially if it makes him better at his craft.

EXPERIENCE

Senior Software Developer

Schrödinger, Portland, OR | Apr 2019 - May 2023

- Created a number of mission-critical public web services for the largest open library of medicine in the world.
- Organized top-notch development process and environment with CI/CD, auto-generated documentation, and deployment orchestration.
- Designed a clean public API with extensive developer documentation and a simple onboarding process.

Software Engineer

Centro – Sterling, VA | Feb 2017 – Feb 2019

- Constructed a Chrome developer tool to help developers debug and analyse a proprietary state-management framework.
- Used JSCodeshift (a JavaScript code-mod toolkit) to make application-wide code changes to replace deprecated APIs and code syntax.
- Constructed middleware that allowed React to work with our proprietary model framework.
- Built and analysed an ad exchange platform with React/Angular 1 frameworks.
- Developed friendly Ruby on Rails APIs for our front-end application.

Web Developer

Tactick – Dallas, TX | Aug 2014 – Dec 2016

- Took legacy code and brought it into an MVC pattern proprietary framework
- Oversaw server infrastructure at AWS (EC2, RDS, S3, SNS)
- Tracked and solved end user and client tickets via Trello.
- Set up automated email responses in Mandrill for new user sign-ups to be delivered at intervals
